

# Qing Xia (夏 清)

No. 37, Xueyuan Road, Haidian District, Beijing, 100191

(+86) 186-0192-0416

[neijiangxiaqing@gmail.com](mailto:neijiangxiaqing@gmail.com), <http://hsiatsing.github.io/>

Sept. 2012 - Now  
Beijing, China

## EDUCATION

Ph.D., Computer Application Technology

Advisor: Prof. Aimin Hao (Beihang) and Prof. Hong Qin (Stony Brook University)

State Key Laboratory of Virtual Reality Technology and Systems

School of Computer Science and Engineering, Beihang University

Sept. 2012 - Now  
Beijing, China

Ph.D. (Honorary), Computer Science

School of Advanced Engineering, Beihang University

An elite program, selected from candidates (around 25) in different majors, only 3 in CS

B.E., Computer Science

School of Computer Science and Engineering, Beihang University

Recommended to the Ph.D. program without exams, top 10%

Sept. 2008 - Jun. 2012  
Beijing, China

## PROFESSIONAL SKILLS

- Experienced in programing with C/C++, Matlab, Python, etc.
- Expert in computer graphics and OpenGL, GLSL, etc.
- Expert in geometry processing and shape analysis, especially in shape descriptors and deformations
- Familiar with parallel computing and skillful at using CUDA and OpenMP
- Familiar with machine learning techniques, such as SVM, decision trees, neural networks, etc.
- Experienced in implementing algorithms based on research papers and academic writing

## AWARDS & HONORS

- Excellent New Student Award (Top 400 in NCEE in Sichuan) Sept. 2008
- Outstanding Graduate Award (Outstanding at Beihang) Jun. 2012
- National Graduate Scholarship (3<sup>rd</sup> place of doctoral students in SCSE at Beihang) Oct. 2016
- Excellent Foundation of BUAA for PhD students (Only 3 in CS) May 2017
- Outstanding Academic Paper Award (JCR Q1 paper) Apr. 2018

## PROGRAM EXPERIENCE

- Visual Model and Environment Construction and Its Dynamic Simulation Jan. 2016 – now  
PI: Prof. Hong Qin  
Duty: 3D model analysis and processing and support other multi-source data applications related 3D models
- Data Modeling and Interactive Virtual Surgery of Digital Human Organs Jan. 2012 - Dec. 2016  
PI: Prof. Qiping Zhao and Prof. Aimin Hao  
Duty: Develop virtual surgery prototype system and other related techniques

## ACADEMIC ACTIVITIES

- Attended SIGGRAPH Asia in Shenzhen, China Dec. 2014
- Made an oral presentation on PG in Beijing, China Oct. 2015
- Made an oral presentation on VRST in Beijing, China Nov. 2015
- Made an oral presentation (CAGD paper) on GMP in San Antonio, USA Apr. 2016
- Made an oral presentation (PCI simulator) on SIGGRAPH Asia in Macau, China Dec. 2016

## MAIN PROJECTS

- Real-time simulation and rendering of fluid  
SPH, approximate surface as smoothed depth of particles, add sprays/foams according temporal-spatial analysis.
- Percutaneous Coronary Intervention (PCI) virtual surgery simulator  
A PCI simulator including tissue deformation, catheter and wire simulation, X-ray simulation, haptic feedback, etc.
- Automatic extraction of 3D focal features  
Predict focal features via connections between local features and the distances to focal features using random forest.
- Fast 3D shape interpolation in modal space  
Bring modal analysis into 3D shape interpolation to restrict solutions in modal space and improve efficiency a lot.
- Spline fitting in shape space  
Fit a hyper-curve in feature space to obtain a smooth sequence of 3D shape in Euclidean space.
- Regional descriptor of 3D shape  
We use a center point and a distance range to define a local region based on bi-harmonic distance, and describe this region by integration of global shape information, feature structure and 3D shape context.
